

The Future of Fraud, Waste & Abuse Prevention

commence

A Smarter Defense Against Fraud

Commence™ transforms fraud detection into a real-time strategy that protects programs, providers, and the people they serve.

45% increase in flagged fraud cases

30% drop in false positives

\$165M+ recovered for CMS

Intelligent Data Exchange

Commence securely connects siloed health data in real time—giving teams faster access to medical evidence and emerging fraud patterns.

Matters:

- Fewer manual document requests
- Faster insight across clinical and program teams
- More accurate fraud detection

Automated Medical Records Retrieval & Review

With connections to 1M+ providers, Commence automates retrieval and streamlines reviews—reducing false positives and audit delays.

Why It Matters:

- 80% less manual input
- Greater flagged case accuracy
- Faster recoveries and results

In partnership with 

AI-Based Digital Intake

Commence uses NLP, computer vision, and Generative AI to scan, classify, and extract key medical insights.

Why It Matters:

- Extracts 75%+ of relevant record content
- Auto-tags and summarizes key data
- Delivers clean, FHIR-ready outputs
