

unify *by* commence

Helping hospitals and health programs turn unstructured patient files into connected, standardized data that improves accuracy, reduces burden, and accelerates better care decisions.

Solving the Disconnect Between Patient Data and Clinical Action

Built as an Epic-integrated module, Unify uses advanced technology to turn PDFs, images, and handwritten notes into structured data that powers clinical workflows. Through automation and AI, it strengthens data exchange, precision, and completeness while cutting administrative workload.

Core Capabilities:

Unify redefines how hospitals leverage patient data—advancing a more intelligent, data-driven care environment.

AI-Driven Structuring:
Converts unstructured inputs into usable data.

Epic-Native Integration:
Showroom-compliant, Interoperable via Care Everywhere.

Clinical Efficiency:
Speeds chart prep and reduces manual work.

**Smart Summaries/
Patient Clarity (Roadmap):**
Delivers concise, understandable insight.

Transforming Hospital Data into Greater Care

Unify delivers cleaner data, faster workflows, and greater provider confidence while giving patients the clarity and trust they deserve.

Impact at a Glance

- Faster decisions & reduced review time
- Improved data quality & interoperability
- Higher provider efficiency & utilization
- More engaged, informed patients

Partner with Commence

Shape the future of healthcare—powered by quality data, clinical expertise, and outcomes that transform lives.

Commence. Greater Data for the Greater Good.
